

***DESIGNING FOR PEDESTRIAN SAFETY OR
COMPLETE STREETS WORKSHOP
Doubletree Downtown Milwaukee, WI
August 18-19, 2010***

The Wisconsin Department of Transportation-Bureau of Transportation Safety has set-up two excellent training courses, along with a dinner and a great speaker. You have the opportunity to pick one of the trainings which includes dinner and a great opportunity to socialize with your colleagues:

DESIGNING FOR PEDESTRIAN SAFETY:

A **two-day** course to help state and local transportation professionals, and pedestrian advocates address pedestrian safety issue through design and engineering. The course is perfectly suited to engineers, planners and traffic safety and enforcement personnel and advocates that are looking for solutions to make changes to the physical environment to improve safety for pedestrians.

Participants will learn the significance of land use street connectivity, and site design in making a safer pedestrian environment, how pedestrians belong in all geometric design, operations, and safety operations, gain a better understanding of human behavior issues related to pedestrians and motor vehicles interacting safely and have a better understanding of the effective solutions and best practices in design and operations for pedestrian safety including.

A critical element of the course involves all participants taking part in two-field exercises including a short pedestrian audit and studying a nearby intersection and providing solutions/suggestions on improving pedestrian safety. **Class size is limited, register early.**

We have two excellent instructors teaching the course:

Michael Moule President of Livable Streets, Inc. and is the past President of the Association of Pedestrian and Bicycle Professionals (APBP). He is a Professional Engineer with 16 years of experience in Traffic and Transportation Engineering and its relationship to communities, neighborhoods, bicycling, and walking.

Hillary Isebrand PE, Highway Safety Specialist, FHWA, Resource Center - Safety and Design Technical Services Team. Has expertise as a design engineer as well as a traffic and safety engineer and researcher. She has worked in the transportation profession for over 14 years. Areas of expertise include highway design, modern roundabouts, public involvement, school zone safety, pedestrian safety, older drivers, planned special event operations and construction inspection.

For additional information on the course please visit the website:

COMPLETE STREETS WORKSHOP: (August 18th 1-5:00 PM)

Learn about Wisconsin's new bicycle and pedestrian accommodation law and what impact it is likely to have on the way streets and highways are built in the state. This workshop will introduce participants to the new state law, the federal accommodation policy, and draft administrative rules covering the law. There will be a discussion on what are considered bicycle and pedestrian accommodations. Examples of complete streets will be provided, as well as when and where it is reasonable to make an exception to the law and not provide accommodations for one of both of these modes. Challenging projects will also be showcased to give participants some idea of how both bicycle and pedestrian accommodations can be included in tight right-of-way settings and within tight budgets.

Workshop will be presented by two superior speakers:

Tom Lynch, Strand and Associates
Tom Huber, WisDOT

DINNER (5:30-7:30 PM)

Dinner will be served from 5:30-6:30 pm, followed by an excellent Complete Streets presentation from two great speakers:

Michael Moule President of Livable Streets, Inc. and the past President of the Association of Pedestrian and Bicycle Professionals (APBP)

Kevin Hardman Executive Director of the Bicycle Federation of Wisconsin

You will hear how Complete Streets is working in other parts of the United States, along with how Complete Streets will increase the opportunities for people to walk and bicycle in Wisconsin, at the same time improving the safety of pedestrians and bicyclists.

Please register me for (check one of the 3 below):

_____ **Designing for Pedestrian Safety Course (August 18-19th)**
(Includes lunches, breaks, and dinner)

OR

_____ **Complete Streets Workshop (August 18th 1-5:00PM)**
(Includes an afternoon break and dinner)

OR

_____ **Dinner Only (5:30-7:30 PM)**

Registration fee is **\$20.00**. **Please make checks payable to Wisconsin Department of Transportation**, and mail to the address below.
